

COVID-19 WARNING

COVID-19 is a very contagious disease that can cause severe illness and death. Older adults and people with underlying medical conditions are at higher risk.

An increased risk of exposure to COVID-19 exists in any public place where people are or recently were present.

Participation in this activity will increase your child's exposure to COVID-19, which increases the risk of exposure to those with whom your child interacts.

By allowing your child to participate in this activity, you knowingly and voluntarily assume all risks related to exposure of COVID-19.

Your child must follow all posted and verbal instructions at all times while participating in this activity.

COVID-19 spreads easily between people

According to the Centers for Disease Control, the virus is thought to spread mainly from person-to-person.

- Between people who are in close contact with one another (within about 6 feet).
- Through respiratory droplets produced when an infected person coughs, sneezes, or talks.
- These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.
- COVID-19 may be spread by people who are not showing symptoms.
- The virus spreads easily between people.

The virus may be spread in other ways

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes.
